Battery Test Technician

July 26th, 2019

Only five battery chemistries have been commercialized in the last two centuries. Natron Energy is the sixth. Natron's products offer breakthrough performance for applications requiring high power or extreme cycle life, such as data center backup power and EV fast charging support. Our technology can be manufactured utilizing standard Lithium Ion facilities, allowing Natron to scale quickly and efficiently. Customer trials have been successfully completed, and the company is scaling rapidly to meet market demand. Natron is backed by seven leading venture capital and strategic investors.

Natron is seeking a Battery Test Technician to assist in the testing of battery cells, modules and packs. The occupant of this position will be configuring battery test instruments, setting up batteries for testing, performing tests, and logging test data. Qualified applicants will have prior hands on lab experience, preferably in the field of batteries or electronic hardware device testing. The person for this position has a positive, team-first attitude, carefully follows instructions and SOPs, is meticulous and detail oriented, and is willing to learn and master new skills. The person will be working in a fast paced and dynamic environment.

Responsibilities:

- Assemble cells into test fixtures
- Connect batteries to various testing equipment
- Implement battery test schedules and protocols
- Enter data to track cells, modules and packs
- Calibrate and maintain testing and environmental control equipment

Experience and Skills:

- Strong experience executing SOPs
- Prior experience testing battery cells or other electronic devices is strongly preferred
- Proficient in Excel
- Careful and meticulous when working with samples and when entering data
- Has a positive, team-first attitude and thrives in a fast-paced environment
- A degree in a science or engineering field is preferred.

Logistics:

- Compensation: competitive with those of other engineering technician positions at Bay Area start-up companies
- Hours and duration: permanent position, full time on site
- Location: Santa Clara, CA
